The Nugget Is California's Leading Mining Weekly

Nevada City Nugget

VOL. VI, NO. 36 | The GOLD Center | NEVADA CITY, CALIFORNIA | The County Seat Paper | FRIDAY, JULY 15, 1932

COUNTY RECEIPTS FOR LAST MONTH ARE ITEMIZED

During June $12,577.95 was paid into the county treasury, according to the report made by County Treasurer Frank Steel.

Of this sum $4302.42 was received from County Assessor J. M. Hammill for personal property taxes collected by his office from persons owning personal property, taxes due on which were unsecured by real property. The following is the detailed statement of the amounts and the sources:

First National Bank in Grass Valley, interest, $66.97; R. W. Rodda, maintenance at county hospital, $200; Lila M. Champion, public adm. fees, Mulcahy estate, $293.32; Bank of America of T. S. A., interest, $104.12; M. C. Miller, redemption of taxes $15.77; Agnes Worthley, redemption of taxes $12.95; Arthur W. Hoge, redemption of taxes $3.56; Ella M. Austin, Teachers Pr. Ret. Fund col., $284; Nevada County Farm, sale of produce to hospital, $260.40; Pauline Jarvis, redemption of taxes, $283.34; Thomas N. Coan, redemption of taxes $7.43; John A. Mendall, redemption taxes $18.85; Inter County Title Co., redemption of taxexs, $74,87; Mrs. Laura King, postponement of tax sale, $5.29; Carl Penrose, superior court fine payment, $10; Henry Clark, postponement of tax sale, $15.44; Ludwig Netz, redemption of taxes, $17.93; Anna C. Tucker, redemption of taxes, $24; C. A. Ocker, justice fines, $50; George R. Carter, redemption of taxes, $45.28; Dave Cabona, redemption of taxes $13.93; R. W. Rodda, maintenance at county hospital, $117.50; R. N. McCormack, clerk's fees and Law. Lib. tax, $255.75; George R. Carter, sheriff's fees, $4.50; S. J. Clark, recorder's fees, $273.35; John M. Hammill, personal prop. collections, $4320.42; Oscar E. Winburn, justice court fines, $55; W. T. Mobley, justice court fines, $63; Frank Steel, taxes collected month of June, $2909.66. Total amount paid into treasury, June, 1932 $12,577.95. Total paid out of treasury June, 1932, $38,-019.80. Annie T. Sherman, redemption of taxes, $6.21; Elsie Long, redemption of taxes, $58.16; Ella M. Austin, rebate to Nevada Elementary, $3.67; Ella M. Austin, teachers certificates, $24; Elia M. Austin, teachers pr. ret. fund col., $108; Sadie F. Clauson, redemption of taxes, $16.79; Ella M. Austin, teachers pr. ret. fund col., $6; W. F. Stoneback, postponement of tax sale, $113.38; Placer Union High School, tuition to M. L. H. H. Dist., $80; Lyman H. Gilmore, postponement of tax sale, $48.48; estate of A. P. McGee, postponement of tax sale, $7.73; You Bet Mining Co., postponement of tax sale, $1,510.0; Charles A. Morandi, redemption of taxes, $11.77; Eugene Morris, et al, redemption of taxes, $63.35; Frank Steel, bids on sale of state property, June 20, 1932, $203.26.

NEVADA COUNTY HAS GAIN IN TAX ROLLS

Nevada county is one of the few California counties which shows an increase in its taxable property. The report of County Assessor John M. Hammil filed with the board of supervisors shows an increase in the taxable wealth of $94,035.

The total value of county property to taxation for county governmental purposes is $6,154,620. Last year the valuation was $6,060,585.

The cities of Nevada City and Grass Valley showed substantial gains, due, according to Mr. Hammil, to new buildings and remodeling of present structures. The gain in Nevada City was $21,875 and Grass Valley, $11,880.

Phone Line to Ranger Station Is Severed

Someone maliciously cut about 150 feet out of the forest service telephone line running from the local headquarters to the Pike County lookout station a few days ago. The line was severed at a location about three miles south of here and thrown into the brush, indicating that it was done purposely to sever communication between the two points, probably for the purpose of setting fire. There is a severe penalty attached to this crime and there is a possibility of an arrest with a repetition of the act.—Mountain Messenger, Downieville.

Oakland Man Acquires a Strange Playmate

A few weeks ago Lon C. Stamey of Los Angeles, who was camping at Snowden Hill mine, gave all the natives a thrill by coming into camp with a 7-foot king snake coiled around his neck and a smaller one in his pocket, but Saturday afternoon C. W. Pickens of Oakland doubled the thrill by coming into a Camptonville store with a large rattlesnake in the bosom of his shirt. He found the snake on the Pike City road, picked it up, tucked it away, and only took it from his shirt for display purposes. He stroked the snake's back and the reptile grinned as though they were old friends.

Carvin Property in Yuba Pass to Be Explored

Having taken over the Carvin property in Yuba Pass, the Yuba Pass Mining & Resort, Inc., plans are being made to develop the property in the near future. The property consists of five mining claims and a suitable mill site. Two tunnels driven have uncovered ore which is said to contain gold, molybdite, silver and other values. Plans contemplate a large scale development. The property has a good water right.

MINING PERMITS NOT REQUIRED ON PRESERVES

Permits are not required for placer mining on the national forests of California, according to word given out by Supervisor R. L. P. Bigelow of the Tahoe National Forest. Hundreds of men, otherwise out of employment, have ventured into areas suitable for placer mining on a small or large scale and are seeking gold in this fashion. Many a vacant cabin of past years is again occupied, a fact which travelers along the highways and streams have noticed.

Not only are mining operations being carried on, but many of the squatters have garden plots and are raising vegetables in the hope of providing enough food for the winter months. The "back to the land" movement, involuntary though it has been, has been gaining force each week since spring.

The forest service makes no charge for mining efforts on its lands in this region. Ranger stations are excepted from the open areas, and the forest users must comply with fire and sanitation regulations. Otherwise they may labor as they wish.

SIERRA COUNTY WILL CELEBRATE SUNDAY

Celebration of completion of the Yuba Pass national forest highway will be held Sunday, July 17, with a picnic at Masonic picnic grounds above Sierra City.

The picnic site is four miles west of the summit of the pass and is said to be an ideal spot. It is easily reached over good state and federal highways.

The celebration is sponsored by the board of supervisors of Sierra county and will be taged under auspices of the Native Sons and Native Daughters. J. M. McMahon of Downieville, district attorney, is chairman of the committee of arrangements.

The public is invited to participate in the festivities.

NEW AUTO CAMP PLANNED NORTH OF NEVADA CITY

Mr. and Mrs. Lawrence of San Francisco have purchased about 80 acres on the left side of the Tahoe-Ukiah highway about a mile north of Nevada City, known as the old Arnhart place.

They see a splendid future for this section and have started to improve the property. It is situated north of Nevada City and overlooks the town and the beautiful valley surrounding it.

If present plans are carried out this should be one of the most attractive camps in the whole district. At present they are leveling a knoll in front of the two houses on the property where they will erect a service station and machine shop. The building will be 45x130 feet, substantially all-steel construction, with plate-glass front and skylights. A large stock of parts and accessories will make this one of the most up-to-date shops in this section.

A beautiful camp site to the west of the houses has been cleared, leaving the pine timber. Water is to be piped to the ground and several cabins will be built soon. There is an abundance of spring water which has a 90-pound pressure at this level. As time goes on plans are to increase the number of buildings until they will have a modern camp ground. A tractor is being used to move earth from the knoll and make a fill in the ravine, which fill combined with cement work will make a swimming hole between the machine shop and cabins.

The location selected for the camp grounds is one of the best in this section. It will accommodate a large number of tourists and any who desire to use the facilities.

Mr. and Mrs. Lawrence are recent arrivals in our district and we understand they are to move here to make their home. By their kindly and genial ways they will prove a welcome addition to our community.

STATE FORESTERS READY FOR DANGEROUS SEASON

State Forest Ranger W. F. Sharp and Assistant Geo. Howe, of the state division of forestry, are well prepared for the fire hazard this season. This year the state has alloted a force of 20 men to each fire district. At present Mr. Sharp has a crew of 11 men and as the danger of fire increases more men are to be added. By the middle of next week he will hav a full fire crew of a cook, camp tenders, crew leaders and fire fighters. The men stay at Mr. Sharp's office in readiness for the call of fire from the various lookout stations placed at advantageous positions over the district. Mr. Sharp's district is Nevada county outside of the Tahoe national forest.

Last year Mr. Sharp and Mr. Howe were nearly worn out fighting fires and for days at a time they did not take their clothes off to sleep the few hours they were able to get between calls.

The rate last year was fairly high for hourly pay to fire fighters, consequently many fires were thought to be of incendiary origin. This year the state decided to hire men at $25 a month and board and lodging, holding them in readiness for call. This should prove cheaper in the long run and discourage setting of fires, as those setting fires were often picked up and taken to fight res, thereby making money from the evil practice of destroying the state and people's' timber and feed for stock, and also demolishing the much-needed trees on the water-sheds of the mountains.

The state forest service has a powerful, well, equipped truck with which to haul the men and equipment to the fires.

The McFarland Mine Will Be Developed

The old McFarland mine near Hazel Green is to be developed again according to a report reaching here this week.

The McFarland mine has been worked off and on for many years but was never placed on a paying basis although there has been some fine ore shoots developed. John McFarland is to take charge of the work.

The McFarland mine was discovered by a dream, the late John McFarland, Sr., having gone directly to the spot where the vein was found after the vision came to him in his sleep.

PAY GRAVEL STRUCK ON GRAY WING LAND

Four and one-half feet of pay gravel has been reported as uncovered in Hole No. 6, bottomed on bedrock at 76 feet, in the diamond drilling of the Broder ranch, three and one-half miles northeast of Folsom, by the Gray Wing Extension Mining Co. The discovery of the gravel was announced by Ernie R. Gray, superintendent of the company. Gray also said this hole proved the bar they were drilling into to be the largest ever encountered in the Blue Ravine channel, the buried ancient course of the American river.

The holes, all of which have exposed four to nine feet of rich pay gravel ,are being drilled in a straight line across the channel, which makes a horseshoe bend at that point, and prove the bar to be 250 feet wide, with no indication of the rim at either end.

Operations started at this property early this spring and as drilling advances the new company feels assured of a vast deposit of rich gravel.

SCHOOL BUDGETS SHOW HEALTHY CONDITION

With a decrease in the budget for the Nevada City high school district of $15,852 the proposed outlay for the coming year is submitted for consideration and will be open to hearing at 8 p.m., July 18, at the chamber of commerce rooms, to which taxpayers are specially invited.

This decrease has been accomplished without reducing the salaries of teachers or other personnel. The reduction of expense is mainly due to absence of outlay which in 1931-32 was increased because of the fire last year which necessitated repairs on the high school building. A slight decrease is also made in fixed charges and operation of school plant proposed expenditures.

A problem of grave importance is found in the proposed budget of the grammar school, hearing on which will be held at the same time. The present heating system is somewhat antiquated and in the opinion of the school board in order for the building to be properly heated it will be necessary to install a new heating system or make extensive repairs to the present facilities. Bids have called for such remodelling or new installation as may be necessary to take care of the needs of the building.. This improvement is estimated to cost approximately $500. This one item will account for the major part of the $635 increase in the elementary school budget. Decreases are noted in several items of expense in the administration of the instruction cost of Nevada City's grammar school pupils.

RANDSBURG MINE NEWS

By JO. P. CARROLL

Let it be stated that none of the large activties in the present prospective stage are being done by promotion or stock selling concerns. With the state mining bureau engineers, W. B. Tucker and E. J. Sampson, constantly on the job for the Southern California Division of Mines, aiding the Los Angeles Chamber of Commerce, wild-cat promoters will be checked up good and hard.

And to the spreaders of idle statements as to the dollars per yard, will be called on to make good, for when the Los Angeles Chamber of Commerce takes a hand in anything concerning the welfare of Southern California, there will be results.

Britton and Murphy have had during the past year a thorough prospecting examination and sampling of their holdings in both Sand and Goler Canyons; spending their own money well up in five figures, and are now at a satisfactory stage of within the next week or ten days of starting their large sluicing plant for a steady run.

The Gold Dust Company, section 26, is now sinking a double compartment shaft on their holdings, one and one-half miles north of Randsburg, on the Johannesburg channel, besides having a number of drillings made by a well drilling rig to further develop the channel diggings at a depth of 60 feet to bedrock.

Headed by L. L. Locke, prominent Los Angeles building contractor, with associates, Roy Robert, T. B. Weller and C. F. Leichan, the latter two in charge of all developments. Before any gold saving machinery is planned by the close partnership the extensive prospecting, examination and sampling must be carried out.

H. T. Morse, mining engineer, in the interests of Los Angeles capitalists, is continuing an exhaustive and widespread examination of their hundreds of acres situated one mile south of the Atolia Tungsten mining company's No. 1 shaft. Bedock is foun dat 17 feet and less; samplings of a 100-ton nature are satisfactorily handled by a small Ainley wet gold saver on the ground.

A Glendale group brought in a large capacity gold dredger on their proven holdings in Benson Gulch in the Goler Canyon district, failure of the machine to handle the clay, operations have been temporarily suspended or to such time that construction engineers can recommend a gold saving plant that will handle the material from the large gravel banks opened up. This group from Glendale has spent considerable money in proving up the ground, including an 8-inch pipe line connecting with the Yellow Aster's water wells, a mile distant.

A representative of southern capitalists is now completing an examination of the Yellow Aster choice holdings in Goler. A favorable report will mean the immediate bringing in of a large capacity gold saving plant.

Smaller plants of a hundred yard capacity are being constructed south of the Black Hawk mine, south of Randsburg, one wet, the other dry, both machines are within one-half mile of each other, but the builders as yet have not seen the other machine. They are of the trommel type. Either one of them proving successful would mean the chance for prospectors of small means.

With the nearness of the several operations in the districts mentioned a revival of placer and channel mining would follow in the Summit Diggings, Last Chance, old Goler, Black Canyon, Red Rock and other canyons and gulches, following south the "stringer" near Randsburg, Black Hawk, Atolia and one to the Barstow placers. In the dull times of '93-'95, hundreds and hundreds of dry wash mines got by; true, wages and commodities were lower, but the miners were not afraid of the hot sunshine nor the absence of a can-opener. Ten hours a shift was the rule for a day's work.

Register Before July 21 If Your Desire to Vote

If you want to vote at the primary election on August 30 you must register not later than July 21. You may not be much interested in politics but it will not cost you anything to register. Something might turn up by election day and you, as a citizen, should register your vote for or against any man or measure that appears on the ballot. Register today.

OLD TIME ARRASTA ATTRACTS ATTENTION

California's original gold mills of the Arrasta nature are coming back, the first one in late years to be introduced to the Rand mining district by Frank Feldman, on his Pinmore mine lease, near Johannesburg, is now making good. Feldman, like all good mining prospectors, has but little money to equip a gold saving plant that will bring returns; for the present working of gold saver, the capacity of a ton and a half shows successful returns.

Satisfied that the present operations of the Arrasta will not exceed 150 gallons of water to a ton of ore, Feldman in the near future will increase the plant to a four and one-half tons for an eight-hour shift. This increase will mean additional tanks, clean and settling; the power from a Henry coupe, proving satisfactory, will be continued.

"We know that we do get all of the values in the ore milled," is the warrantee for the proposal.

This process of handling ore will mean an incentive to prospectors to get out and find new leads from grass roots. — Randsbury-Mojave Record-Times.

FOREST HILL RANCHER FINDS BIG GOLD STREAK

A find vividly reminiscent of the surface mining days on the Forest Hill divide during the early '50s is reported by former Supervisor G. H. Bisbee, now residing on his 160-acre ranch at Paradise, near Forest Hill. With his daughter, Mrs. Sarah McKenzie, helping him, a seam of gold that netted $1,000 during the last week was found.

Bisbee took the gold to the Placer County Bank at Auburn before shipping it to the mint at San Francisco, to have the value estimated. Bisbee says he has not exhausted the seam yet.

Bisbee segregated about $100 of the gold which he brought to Auburn, and the rest was taken in its natural state in the porphyry, which he found in the seam between the slate and the quartz.

In finding this seam, Bisbee and his daughter brought to light gold that had been overlooked by his own father, who worked the same land in 1857.

The elder Bisbee stayed in California only during the gold rush period, returning to his home in the New England states to remain there until 1898, when he returned to Placer county, and was followed by the son in 1899.

Meanwhile the property had belonged to many other persons, but in 1902 Bisbee purchased the property from Sam Pullen, former Placer county clerk of the superior court and father of Judge J. F. Pullen of Sacramento county.

Bisbee's ranch adjoins the property of Bowman Brothers, on which was found an "egg" nugget several month ago that netted the finders about $600.—Roseville Tribune.

POWDER FOR MURCHIE MINE

More than 500 boxes of powder passed through Nevada City yesterday morning on a truck and trailer coming from Los Angeles and enroute to the Murchie mine, east of the city. This is the second load that has been shipped to the mine by the Newmont company, owners of the mine.

NEW STATE BOOK EXPLAINS PLACER MINING METHODS

In contrast with the grizzled "old times" so often pictured with pan and rocker, the streams and gulches of the western mining states are now lined with another generation of young and middle-aged "amateur" placer gold miners. Railroad men, salesmen, bookkeepers, chauffeurs, clerks and stenographers—for the role of novice gold "diggers" includes women and children—make up the list of jobless who are bringing forth new wealth in many of the western states. The gold production in California in 1930 exceeded that of 1929 by nearly one million dollars and the production in 1931 exceeded that of 1930 by more than a million dollars, and 1932 promises to even further increase the output of the precious metal.

It is true the individual's return is small, probably averaging less than $1 per day per person, but it is enough to buy "grub and overalls" and incidentally the gold-seeker gets a healthy holiday from the city and he is out of sight of a breadline. It is estimated that there are in excess of 12,000 persons now hand-mining on a small scale.

All must learn the knack of recovering the precious flakes and grains from the gold-bearing sand and gravel, and government agencies have been swamped with requests for information. Small-scale placer mining has been particularly active in Colorado ,Idaho, Washington, California and Arizona. Information circulars hastily published to meet the demand have become quickly exhausted.

In order to assist this new industry to the fullest extent possible, the California State Division of Mines, under the direction of Walter W. Bradley, state mineralogist, has for some time been distributing literature giving information as to localities where placer gold may be found, how it can be recovered, where sold, manner of locating claims and many other related questions.

The latest publication issued is "Mining in California" April, 1932, quarterly chapter of State Mineralogist's Report XXVII. This quarterly contains an article on Elementary Placer Mining Methods and Gold-Saving Devises which describes [illegible] and processes both for wet and dry placers, the treatment of black sands, use of sodium amalgam in cleaning up, and marketing of gold, platinum and black sand. In another article the uses of the pan, rocker and sluice box are described and cuts show how they are constructed. The use of the pan in prospecting for vein deposits is described in another article. The "dry" placers of Southern California are also discussed, and an extensive selected biblography on placer mining is given for those who wish to delve further into the subject. The quarterly referred to may be obtained at any of the offices of the State Division of Mines at 25c per copy.

SPRING HILL MINE TO START DEVELOPMENTS

Having acquires an option on the Spring Hill property, east of Grass Valley from the Lakenan Investment Company, H. R. Place, San Francisco mining engineer, and associates are planning reopening of the property, which has long been inactive.

Mr. Place, who was in the district this week, following up his investigations made on a previous visit of several months ago, states that work will open next week on a conservative scale with a small crew of men who have already been employed.

Pay Ledge Struck in Honey Lake Mine

Superintendent H. Sundberg has announced that the ledge has been struck in the lower tunnel of the Honey Lake Valley gold mine. Three tunnels have been cut into the mountain. Sundberg states that they have the same formation on four different levels, representing several hundred feet in depth. The lower tunnel extends into the mountain about 2,000 feet. It is planned to install a mill now and commence grinding ore.

Announces Additions to Staff of Bank of America

G. J. Rector and E. M. Rector have been added to the staff of the Bank of America branches in Nevada City and Grass Valley. George W. Starr, W. F. Prisk and R. J. Bennetts have been added to the advisory board of the institutions.

NEW FIRE CARD PRINTED

A new revised fire card, telling the location of fire alarm boxes in Nevada City, has just been published by the Nugget. Those who do not receive one of these handy cards through our distribution, kindly call at the Nugget office and receive one free of charge.

Salinas—E. L. Sherman purchased "Salinas Index-Journal" from Fred Weybret.

Board of Supervisors Wins Court Award

The board of supervisors won a verdict of $4,000 in the contest of the will of Stewart McKay, pioneer Truckee resident, who bequeathed that sum to the poor children of Nevada county before his death in 1920. The money will be transferred to to the general fund to reimburse the county for funds taken from that account and used for that purpose pending the decision. According to County Clerk McCormack it will now be possible to decrease the tax levy for the general fund approximately six cents on $100 assessed valuation.

Early rush to Chile gold fields is forecast in late news dispatches.

Placer Mine Wanted

Will equip or buy for cash good placer property. Wish to deal with owner only. Send detail information in first letter. Address H. Plaine, 345 S. Hill St., Los Angeles.

SCHOOL BUDGETS

NEVADA CITY 1932-1933

In compliance with State School Law (see page 196) the following School Budgets for 1932-1933 are submitted to the public for consideration. Taxpayers are especially requested to attend a hearing on these budgets to be held in the Chamber of Commerce Room, at 8 p.m., Monday evening, July 18.

Respectfully,

ELLA M. AUSTIN,
Co. Supt. of Schools.

ELEMENTARY SCHOOL BUDGET

Budget for Nevada School District in Nevada County, State of California.

To the County Superintendent of Schools of Nevada County, State of California:

By order of the governing board of Nevada City School District made at a regularly held meeting on June 13, 1932, the undersigned were instructed to submit the following budget for the school year ending June 30, 1933.

TOTAL PROPOSED EXPENDITURES

		Expended for Year 1931-1932	Estimated for Year 1932-1933
1.	General Control	$ 210.00	$ 210.00
2.	Teachers' Salaries	13,990.00	13,990.00
3.	Other Expenses of Instruction	400.00	400.00
4.	Library	250.00	250.00
5.	Operation of School Plant	2,030.00	2,005.00
6.	Maintenance of School Plant	900.00	1,100.00
7.	Fixed Charges	200.00	250.00
8.	Capital Outlays		
9.	Auxiliary Agencies and Sundry Activities	900.00	1,300.00
10.	Total	$18,880.00	$19,505.00

NOTE:—The various items to be considered under the above headings are noted in detail in the following; the sequence of headings is different, the arrangement above being in harmony with the U. S. Bureau of Education; that below being planned on the basis of the fund provisions of law.

PART I. TEACHERS' SALARIES

TEACHERS' SALARIES	
Salaries of teachers	$12,190.00
Salaries of principals and supervisors	1,800.00
Total Teachers' Salaries	$13,990.00

PART II. OTHER MAINTENANCE EXPENDITURES

GENERAL CONTROL	
Expenses of school election to be incurred by district	$ 25.00
Salaries, supplies and other exxpenses of office of secretary of city board of education or clerk or board of trustees	75.00
Expenses of superintendents and school principals at official conventions or while on official business	60.00

HIGH SCHOOL BUDGET

Budget for Nevada High School District in Nevada County, State of California.

To the County Superintendent of Schools of Nevada County, State of California:

By order of the governing board of Nevada High School District made at a regularly held meeting on June 13, 1932, the undersigned were instructed to submit the following budget for the school year ending June 30, 1933.

TOTAL PROPOSED EXPENDITURES

		Expended for Year 1931-1932	Estimated for Year 1932-1933
1.	General Control	$ 200.00	$ 200.00
2.	Teachers' Salaries	14,600.00	14,600.00
3.	Other Expenses of Instruction	500.00	500.00
4.	Library	500.00	500.00
5.	Operation of School Plant	1,692.00	1,686.00
6.	Maintenance of School Plant	1,475.00	1,175.00
7.	Fixed Charges	150.00	250.00
8.	Capital Outlays	16,652.57	800.00
9.	Auxiliary Agencies and Sundry Activities	1,350.00	1,350.00
10.	Laboratory Supplies	200.00	200.00
11.	Total	$37,619.57	$21,261.00

NOTE.—The various items to be considered under the above headings are noted in detail in the following; the sequence of headings is different, the arrangement above being in harmony with the U. S. Bureau of Education; that below being planned on the basis of the fund provisions of law.

PART I. TEACHERS' SALARIES

TEACHERS' SALARIES	
Salaries of teachers	$11,800.00
Salaries of principals and supervisors	2,800.00
Total Teachers' Salaries	$14,600.00

PART II. OTHER MAINTENANCE EXPENDITURES

Gold Bricks Shipped to Mint Every Two Weeks

Gustav Bender, now cyaniding the tailings of the old Phoenix mill, Johannesburg, reports that the plant is running smoothly, so well, that he is expressing a four pound brick to the U. S. Mint every two weeks.

CAMPTONVILLE SCHOOLS OPENED LAST MONDAY

The Camptonville grammar school and Camptonville branch of the Marysville high school began the new term Monday, July 11. Some families recently moving into that section are expected to increase the attendance. Mrs. Grace Pauly and Miss Helen Jackson will teach the grammar school, with Mrs. Kate Hope Livingston continuing as high school instructor. W. A. Lang, one of the bus contractors, has recently purchased a new bus which will start on the service.

The duPont plants at Richmond, Va., recalled about 500 men this week.

CALIFORNIA TO PARTICIPATE IN CENTURY OF PROGRESS

California plans to have one of the outstanding exhibits at Chicago's Century of Progress exposition next year, Governor James Rolph, Jr., told exposition officials in Chicago.

Governor Rolph's statement followed a visit to the fair's administration building and an inspection of the 300 acres of land and water area on which the fair buildings are being erected.

"I am enthused at the progress being made on the exposition, at the comprehensive plans, and at the beauty of the site," said Governor Rolph.

"We in California remember with gratitude the splendid exhibit of the state of Illinois at the Panama-Pacific Exposition in 1915, and we plan to repay that debt."

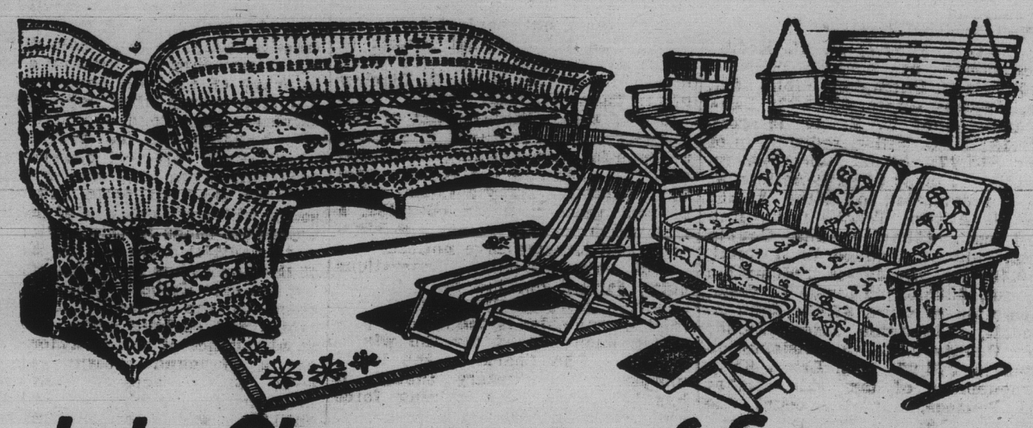

California has already appropriated $100,000 for participation and is planning to hold exhibits of the olive, citrus fruit, artichoke, gold mining and other California industries.

YUBA RIVER COUNTRY

Four miles above Sierra City on the beautiful Yuba Pass highway is the gateway to the Lakes Basin Recreational Area with its innumerable lakes, large and small, sparkling blue and green water, pine fringed and rock bound. Any one of them a wonderful spot to spend a day, week, month, or the whole season. If you wish—you'll be happy; if you enjoy camping, no more wonderful spot exists; if you stop at a lodge and eat three appetizing meals daily, and wish there were six, there are numerous lodges at the various lakes that will give you just what you want; if you like to paint, photograph, or just sit and admire—you will find dozens of views everyday that can not be surpassed regardless of where you may seek . Out on one of these lakes in a canoe or boat on stretches of sunny snore, or under the cool shade of tall pines, the time will fly and regretfully you will have to be on your way. And with you as with others ,it may become an annual affair and year after year you will wind your way up through Grass Valley, Nevada City, along the North Fork of the Yuba Canyon, past Downieville, Sierra City, underneath the Sierra Buttes to one of these marvelous lakes.

A mile above the junction a road branches to the left, crosses Sardine Creek to another junction. The right to Packer Lake and left half a mile to where the Lower Sardine Lake lies. Just before reaching this a small pond is passed and then suddenly the entrancingly beautiful Lower Sardine Lake with the majestic snow covered Sierra Buttes in the background is sighted. Under the trees along the shore are numerous tents, some of fishermen, and some just campers who love the 5,000 foot elevation, the cool clear nights ,the sunny days, the snow clad peak, the cooking over a camp fire and the swimming suit life.

From this point a private road leads up to the Young America mine, a gold mine operated by the Doak family of Napa Valley. From there several short trails lead to the Upper Sardine Lake which vies with one or two others for the title of "America's Most Exquisite Mountain Lake." Almost perpendicularly the broad Sierra Buttes white with snow rise from the water half a mile to the jagged saw-tooth ridge that forms the peak. Along this ridge nature has sculptured a perfect bear crouched with head back for the jump onto the rock which forms the top most point of the peak.

Packer Lake lies three miles beyond Sardine Lake Junction. Here the road winds among the rocks in the cool shade of dense foliage across flashing mountain streams to a sudden glimpse of Packer Lake. The fall dashes down a rocky precipice to Packer Lake Lodge. This lodge, run by Mr. Hallock, consists of a log cabin lobby and dining room where meals are served on the American plan and a group of log cabin cottages. Painting, fishing, swimming, hiking, or just plain loafing are in order at all times.

A few miles up the Blairsden highway another road turns off to the Salmon Lakes and McGees Resort. There are many other lakes before Gold Lake is reached. At Gold Lake —in the early 50's—hundreds of pioneer miners sought for the spot where a mountain lake was reported fabulously laden with gold—perhaps (so they thought) the source of all gold. Surrounding Gold Lake are numerous others, all essential to this region in making of the Lakes Basin Recreational Area the future scenic mountain playground of California.

FRENCH CORRAL

Mrs. T. F. Fogarty and son, Clyde and Miss Dana of Marysville, Mr. and Mrs. W. E. Moulton and daughter, Frances, and Irvine Wetzel, formed a party who made a trip to the lakes above Sierra City recently.

Will Culver and Miss N. Chatty spent the week end with Mr. Culver's parents, Mr. and Mrs. J. W. Culver of French Corral.

SEAWELL OPPOSES SPECIAL SESSION

In a letter to Governor Rolph, Assemblyman Jerry Seawell, candidate for state senator, gives his views on the proposed special session for passing a water program. he letter is as follows:

Dear Governor Rolph:

In answer to your telegram regarding proposed special session of the legislature for the purpose of passing upon your water program, please be advised as follows.

I am personally opposed to any special session for whatever purpose called at this time as I do not believe any good can be accomplished from the same. I am not committing myself for or against your program as I am not technically or legally familiar with its contents and do not believe I could become familiarized with it to intelligently pass upon such legislation during a "short session" called for that purpose.

As you know there will be many efforts to amend your program and without the opportunity to study the amendments before committees, I am afraid that this will become hurried legislation and for that reason bad legislation. I cite the Bank Act passed in the 1928 special session which cost the state several millions of dollars in revenue, as evidence and proof of my contention.

I sincerely trust you will withhold calling a special session and allow this program to take its natural course during the 1933 session of the legislature.

GOLD FROM INDIA IS BEING SOLD IN ENGLAND

During the past few months, India has been restoring gold to the world far in excess of the annual selling their gold, the masses of Inworld production of new gold. In dia are doing so because they are able to make a profit. This movement is the direct result of the fiscal policy of the Indian government and the abandonment of the gold standard by Great Britain. In 1928, India adopted the gold standard based on a rupee value of 36c. Before that she had the silver standard and a 32c rupee. Now that gold is selling at a premium in England, the selling of gold becomes advantageous and profitable to India.

WANTED —MORE HOMES

Today but few homes, houses, apartments or other accommodations for the influx of people who seek to make Nevada City their permanent residence are being erected; very, very few.

As the ultimate center of progress and development of the Mother Lode district, Nevada City is in line for an opportunity to increase its population materially in the next few years. To realize the full benefit of this increase in residents there must be more homes erected.

One man remarked that there were plenty of empty houses n Nevada City, and when asked where they were, he mentioned a few. He was right—but should someone inhabit them the houses would probably collapse from the strain of being tenanted once more.

The modern trend of civilization demands clean, up-to-date living quarters and will not long remain where they cannot live in the manner in which they are accustomed, and inevitably Nevada City must bow to the trend of modern civilization.

It is to the advantage of every merchant and resident of this city to put forth every effort to see that Nevada City is the center of the development of the Mother Lode. It is to the advantage of all to see to it that the influx of people that development will bring here as permanent residents can be properly houses in modern homes.

We need more homes NOW!

COPPER—THE ROYAL METAL

There is scarcely a mechanically actuated thing in existence that does not depend on copper as an essential part of its make-up. Without copper, communication and transport could never have reached their present stage of development —regardless of whether the communication or person or property concerned moves through the air, on the earth, on or under the water.

It is safe to say that nothing in the way of the development or use of mechanical energy in any form or manner, could have possibly reached the present stage of perfection without the indispensable copper.

Altogether it is a royal metal in respect to its influence on the progress and welfare of civilization. It has no superior or rival except gold such as may seek an incidental and subordinate place in its association.

MAKING THEIR OWN PROSPERITY

News dispatches from the entire gold mining region of the United States contains much encouragement to seekers of the yellow metal. Many of the unemployed have found that small returns can be had and health gained by washing gravel of the streams of the gold country. New money secured in this way and by using new methods to recover values passed over in former days will be far more effective in restoring prosperity that the platitudes emanating from various sources that prosperity is just around the corner, even though there are now many signs which augur well for an early return to normal times.

Many politicians have glided into office on flimsy sails, but now we have them coming down on us in an autogiro. It is to be hoped that should the "whirlwind" politician be successful in his efforts, he will not be content to "glide" along serenely, ignoring the wishes of the people by whom he is placed in office.

NEWS IN BRIEF

Gives Bridge Party—

Mrs. Lou Elkus was given a delightful surprise party recently by a number of friends at her home on Park avenue. She had planned to visit, and while answering the phone the group of ladies arrived unannounced. Bridge was enjoyed until dainty refreshments were served. Mrs. Joe Huy won first prize, while Mrs. Randall won second. Those present were Mrs. Elya Kilroy, Mrs. Randall, Mrs Huy, Mrs. Theodore Rundy, Mrs. Aubrey Wisker, Mrs. Ray Davis, Mrs. Lou Elkus and Miss Alma Marsh.

Birthday Party Enjoyed—

Mrs. Lou Eckus entertained several little friends of her seven-year-old son, Robert, last Friday at a birthday party and swim at Memorial Park. Those present were June and Billy Chenowith, Maxine and Merton Austin, Edwin Berger, Jean Fitzsimmons, Catherine Davis, Edward Jacobs, Leonard Gilbert, Alice Hammond, Elsie Schreiber and Bob and Billie Elkus.

New Birth Record—

At Grass Valley the vital statistics for June set a new high record for births and deaths. Nine birth were recorded and only two deaths during the month. For many years the births and deaths have held about an even balance, with deaths slightly in the lead.

Newlyweds to Live in Grass Valley—

It has been learned that Corey C. Brayton, mining engineer, and his bride, the former Miss Anna Ritter of Long Beach, will make their home in Grass Valley upon their return from a honeymoon in the Hawaiian Islands.

Camp Pahatsi to Open—

Camp Pahatsi, at Kilborn Lake, will open a session next Sunday for Boy Scouts from Nevada and Placer counties.

Elm Beetle Attacks Trees—

A third invasion of the elm beetle in Nevada City and Grass Valley threatens the extermination the fine growth of these trees. Trees in all sections of the cities have been attacked so vigorously during the last few days that extermination seems certain. Equipment of sufficient range is not available to spray the trees, although many residents are using various means to control the pest. The first season some aid from the state was had in the way of loaned equipment but this was later withdrawn.

J. M. Hoff and Mr. Rogers were Nevada City visitors yesterday.

Miss Lula Marsh and party of friends of Berkeley were recent visitors at the home of her sisters, Miss Alma Marsh and Mr. and Mrs. Aubrey Wisker.

Miss Beth Young left by airplane Monday morning from Gilmore field for Sacramento, where she will spend a week visiting friends. It took 20 minutes to make the trip.

Mrs. Sadie Rogers came down from Alleghany with her daughter, Mrs. Flewellyn, and spent some time here with her daughter, Mrs. Louis Davidson.

Mr. and Mrs. Will Hatch and children were visitors at Lake Tahoe a few days ago.

The new home of George Clutted at the foot of Boulder street is going up at a rapid rate.

Wm. Lacklin of North San Juan was in Nevada City recently.

W. E. Martin of French Corral was a business visitor Monday.

Mr. and Mrs. Henwood and children of the bay region are visiting her mother, Mrs. Clemente Muscardini, and family of this city.

Bynum Craig of San Francisco visited his aunt and uncle, Mr. and Mrs. Robert Ewing, last week.

Gilbert Clark, who has held a position with the Lace House for many years, has gone to Canada to visit his parents.

Mrs. Henry Goering of Reno is visiting her brother, N. Robins, and family here.

Dr. Henry Searls and son, H. H. Searls, of San Francisco, are visiting his mother, Mrs. Fred Searls.

Will Carter of Downieville was a recent visitor here with his parents, Mr. and Mrs. R. Carter.

Mrs. Lee A. Garthe has as guests her daughter and husband, Mr. and Mrs. H. Smith of Pittsburg.

Robert M. Searls, San Francisco attorney, and brother, Fred Searls, vice-president of the Newmont Mining Company, who resides in New York City, were recent visitors with their mother, Mrs. Fred Searls.

C. S. IeBoyteaux, mining man of Pasadena, was an overnight visitor in Nevada City, enroute to his mining property near Goodyears Bar.

C. D. Wickes, mining man, came over from Reno several days ago to attend to business affairs.

Miss Christy Jane Holmes of Sacramento is spending part of her vacation in Nevada City with her father, A. M. Holmes, and family.

W. E. Sirbeck, president of the West Mines Co., of Reno, and F. A. Schlanger, Reno and San Francisco stock broker, were inspecting property in the district this week.

R. H. Shaw, Fullerton mining man, was inspecting property this week on behalf of Southern California interests.

JOBS FOR ALL

-if dollars *circulate!*

Leading economists agree that a complete change of mental attitude on the part of each individual will help more to restore good times than any other factor . . . Bank of America's great statewide "Back-to-Good-Times" campaign has caused many thousands of wideawake Californians to make an economic right-about-face . . . They have discarded the old blue glasses of negative thinking, shed their needless fears, and have regained their courage and confidence . . . The next important step is to put all our unemployed back to work by *circulating every idle dollar* through our banks and business houses . . . A working dollar is more useful than a million in cold storage. It helps to build homes, keep factories busy, create business activity, finance agricultural interests, and keep ships and freight cars moving . . . The silver lining is *already visible* — and a change of mental attitude — a return to normal habits of buying and living and *thinking* will make everyone see it.

Now the Wellman sterilizer as low as $6.40 down

A MAKE-SHIFT or worn-out sterilizer may be running up bacteria count and lowering the quality of your dairy products with a net result of slim profits.

But the dairyman using a Wellman Electric Sterilizer easily meets the bacteria count requirements of state and city ordinances. He finds also that bacterial reduction and the saving in time and labor, mean better quality products and more profit.

The Wellman sterilizer is made in sizes for dairy farms with herds of any number up to 65 cows. It is is easy to install, coming complete with automatic water level and patented outlet, approved switch-box, and five feet of flexible conduit connecting switch and heater. Electric heating elements are provided with an *automatic* safety cut-out which prevents damage to the heater if the water is allowed to run dry. Because of the cleanliness of electricity, this sterilizer can be placed in your milk room. The efficiency of the Wellman Sterilizer is unusually high; its operating cost is extremely low.

Now, when you can take advantage of easy terms never offered before, is the time to install a Wellman Electric Sterilizer on your dairy farm. For complete information, get in touch with a Rural Power Representative through our nearest office.
